PROFILE SUMMARY

I am a **Data Science Trainee** developing strong technical expertise in **Excel, SQL, Python, and data visualization tools**. I am enthusiastic about **Machine Learning** and applying data science techniques to solve real-world problems. Currently, I am **pursuing an M.Sc. in Information Technology from Gujarat University**, and my journey is focused on building **strong analytical thinking and a problem-solving mindset**.

KEY SKILLS

- **Programming & Querying:** Python, SQL
- **Data Analytics:** Data Cleaning , Data Summarization
- **Visualization Tools:** Microsoft Excel
- **Libraries & Tools:** Pandas, NumPy, Jupyter Notebook , Vs code
- **Other Skills:** Critical thinking, Problem Solving

PROFESSIONAL EXPERIENCE

Infolabz PVT LTD – Ahmedabad, Gujarat
Web Developer Intern | May 2024

- Developed and maintained responsive web applications using **HTML, CSS, JavaScript, Python, and Django**.
- Collaborated with teams to design user-friendly layouts, enhancing site performance.
- Optimized user experience through meticulous testing and strategic improvements.

EDUCATION

2019-2020	10 th S.S.C 77.33%	Sheth Nanubhai Vidhya mandir
2021-2022	12 th H.S.C 88.86%	Sheth Nanubhai Vidhya mandir
2022-2025	BSC.IT (CA & IT) 4.21 GPA (Out of 5 GPA)	K.S. School of Business Management and Information Technology

SOFT SKILLS & HOBBIES

- Critical Thinking and Problem Solving
- Time Management and Communication and Collaboration
- **Hobbies:** Playing Cricket

PROJECT

- **Retail Sales & Customer Behavior Analysis (SQL) :** [GitHub](#)
 - Analyzed retail sales data using MySQL star schema to study customer purchasing behavior.
 - Used advanced SQL concepts such as CTEs, Window Functions, GROUP BY, and JOINS.
 - Identified high-value customers, top-selling products, and store-wise revenue trends.
- **Global Energy Data Analysis (SQL) :** [GitHub](#)
 - Performed regional and scenario-based energy analysis using advanced SQL techniques.
 - Applied CTEs, Window Functions, JOINS, and Views to calculate YoY growth and classify energy levels.
 - Delivered business insights through Excel dashboards for executive and analyst reporting.
- **Swiggy Sales Performance Dashboard (Excel) :** [GitHub](#)
 - Built an interactive sales dashboard to analyze Swiggy order and revenue data.
 - Performed data cleaning and KPI creation for sales and customer trends.
 - Analyzed city-wise performance, peak ordering times, and top food categories.
- **Blinkit Grocery Sales Data Dashboard (Excel) :** [GitHub](#)
 - Designed a dynamic Excel dashboard using Pivot Tables, Charts, and Slicers.
 - Analyzed outlet performance, product categories, and sales trends.
 - Delivered actionable insights through automated visual reporting.
- **Sales Performance Analysis Dashboard (Excel) :** [GitHub](#)
 - Built three Excel dashboards using Pivot Tables, Power Query, and interactive slicers.
 - Analyzed sales trends, customer behavior, and regional performance to generate business insights.
- **Helmet Detection:** [GitHub](#)
 - Developed a **Helmet Detection System** using YOLO to identify riders **with and without helmets** from images and live video streams.
 - Prepared and cleaned a **custom dataset**, including labeling and preprocessing.
 - Trained the model on **Google Colab with GPU acceleration** to improve training efficiency.
 - Enhanced model performance using **data augmentation** and **hyperparameter tuning**.
 - Implemented **real-time detection** using **OpenCV** with live camera input.
 - Achieved approximately **78% detection accuracy**.
- **Institute Management System:** [GitHub](#)
 - Designed and developed a scalable School Management System (SMS) to automate student enrolment, grading, attendance, and administrative operations.
 - **Technology Stack :** HTML, CSS, JavaScript, JQuery, Bootstrap, PHP, MySQL (XAMPP).
